

Unknown Planets

Version 1.0 introduction phase

Unknown Planets is a sci-fi resource management (later versions will be strategic as well) game in EOSIO based blockchains.

What is the goal of game?

In game players have to construct their owns mines and exploit the planet's resources toward building other structures.

Players also should train their armies, in order to explore zones or fight with planet creatures. Player who defeats **Game Boss** would win the game reward and the game will be over.

New game in a new planet will be started after the game is over.

Who can play this game?

All players that have Telos account can play for free and enjoy the game.

What can players do in this game?

In version 1.0:

- Build structures
- Upgrade structures
- Extract available resources
- Training their own armies
- Upgrade army units
- Buy or sell armies in TLOS
- Buy or sell resources in TLOS
- Zone explorations with aim of finding more resources
- Attack and engage creatures
- Fight with boss to win Game Reward
- Perform Random missions

What are the next features this game?

- Players can have their unique commander
- Craft system will be added
- Working on PVP
- Working on alliance
- More races will be added
- Several new abilities, features, bug fixes and more balancing will be included

What is the benefit for players?

- It is fun
- Players can sell extracted resources for TLOS
- Players can sell their armies for TLOS
- Players can try to defeat Boss to win huge amounts of TLOS

In later versions:

- Players can sell crafted resource for TLOS
- Players can sell crafted items for TLOS

What are the benefits for TELOS?

We believe this game creates a significant turnover in TELOS. Hence, it is a huge step forward for TELOS ecosystem.

Also, if we get excellent support from TELOS, we will make this game **EXCLUSIVELY** for TELOS.

At what stage is the project?

At this moment smart contract is version 0.8 and under testing and balancing for release. We are very close to version 1.0.

As you may know, the smart contract is not all; we must create an appropriate gameplay for this game and a strong backend to enhance gameplay.

Therefore, for having fun moments with together in TELOS we need your supports.

We also need your support for smart contract, gameplay and backend developments.

Funding

3000.0000 TLOS

In fact, we need more investment to continue this project. We need about 400000.000 TLOS for this project. This WPS tell us how TELOS community think about Unknown Planets project.

If we get positive feedback, we will create another WPS with more details about Unknown Planets.

Also, we accept partnerships.
